

NEPHROLOGY

DEPARTMENT OF NEPHROLOGY

The department specializes in complete evaluation and treatment for patients with Proteinuria, Glomerular disease, Acute kidney failure due to fever, diarrhoea, malaria, etc., Chronic kidney disease due to diabetes, hypertension, kidney stones, etc. It also treats kidney transplant patients with various medical problems and conducts various dialytic therapies as mentioned below:

- ◆ Clinical Nephrology
 - ◆ Kidney Biopsy - Peritoneal Dialysis
 - ◆ Plasmapheresis & Plasma Exchange
 - ◆ Hemoperfusion in Poisoning
 - ◆ Haemodialysis Unit with sophisticated dialysis machines for maintenance dialysis and emergency dialysis (available for 24 hrs.) backed up by modern Reverse Osmosis plant. Hepatitis B, C positive patients are treated on separate units.
-
- ◆ Continuous renal replacement therapy procedures like:
 - 1) SLED(Slow Low Efficiency Dialysis)
 - 2) CAVH(Continuous Arterio Venous Haemofiltration)
 - 3) CVVHD(Continuous Veno Venous Haemodialysis)
 - 4) CAVHD(Continuous Arterio Venous Haemofiltration & Haemodialysis)
