## DEPARTMENT OF UROLOGY

The state-of-the-art urological department is equipped with the latest endoscopes, C-Arm with image intensifiers, endocameras and a Dornier Sigma Lithotripter. The department offers various surgeries where every disorder or complication can be treated with care and efficiency.

The department routinely conducts endoscopic surgeries for stones and Prostrate :

- ◆ Cystolithotripsy for bladder stones
- ◆ Urethro cystoscopy
- ◆ Urethorenoscopy for Urteric stones
- ◆ PCNL for Renal stones
- ◆ TURP

The department has procured the latest highly advanced lithotripter (ESWL) for stone crushing without surgery which is done as an out-patient department procedure.

Endoscopic surgery for the prostate is routinely done. In addition to this work, all types of cancers of the Urinary tract, sexual problems , erection problem and abnormalities of genital organs are handled.
